Acadian 100% Soluble Seaweed Extract Applications:

Innovation from the Ground up.

What is acadian. 100% Soluble Seaweed Extract?

Acadian Seaplants Limited is the global bio-technology leader of premium quality seaweed-based agricultural inputs since 1981. Derived exclusively from *Ascophyllum nodosum*, the most researched seaweed species for agriculture use in the world, Acadian® 100% Soluble Seaweed Extract is produced using unique, proprietary process technologies that liberate the active compounds in their most uncompromised and active state.

Applications of Acadian® 100% Soluble Seaweed Extract throughout the season improve desirable yields, root growth and early plant development, nutrient uptake and aid in stress resistance and recovery.

Acadian AgriTech, the agricultural division of Acadian Seaplants Limited, has carefully extracted *A. nodosum's* organic components which can be foliar or soil applied. These active compounds prime and elicit cell growth, enhance plant development, and improve overall crop health during times of environmental stress. Acadian AgriTech also provides technical support and advice to ensure optimal applications for best success. We are dedicated to providing science-based solutions and delivering sustainably-produced products that are proven to succeed.

To start getting a greater return on your investment – contact your local distributor today!

Expect the best, demand Acadian®

Research has confirmed that Acadian® 100% Soluble Seaweed Extract's active compound profiles are unique and consistent when compared to every other seaweed-based product in the world.

Benefits:

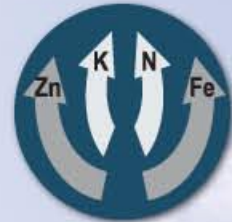

IMPROVES ROOT GROWTH AND PLANT DEVELOPMENT

INCREASES DESIRABLE YIELD

MAXIMIZES CROP POTENTIAL DURING PERIODS OF STRESS

IMPROVES PLANT NUTRITIONAL HEALTH

IMPROVES PLANT VIGOR

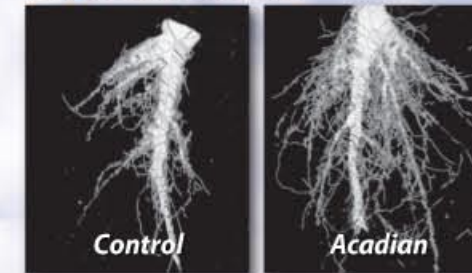

Acadian's technology has been field tested on over 80 different crops worldwide.

Maximizes crop potential during stress conditions

Greenhouse Tomato Drought Trial, Dr. James S. Craigie R&D Center, Canada, 2008.

Improves root growth and plant establishment

Lettuce Field Trial, Brawley, California, USA, 2007.

Maximizes crop potential during stress conditions

Strawberry Salinity Field Trial, Ventura, California, USA, 2007.

Greenhouse Salinity Pepper Trial, Dr. James S. Craigie R&D Center, Canada, 2008.

Improves plant nutritional health, tillering, and number of heads per plant

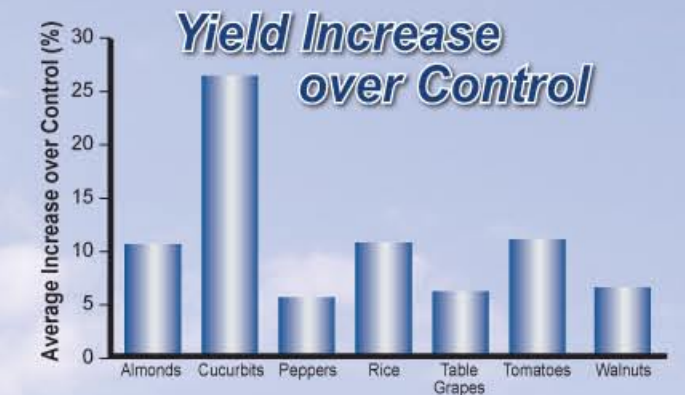

Rice Field Trial, Yolo County, California, USA, 2008.

Improves berry size and crop uniformity

Wine Grape Field Trial, San Luis Obispo, California, USA, 2006-2008.

acadian. GENERAL APPLICATIONS

APPLICATIONS	RATES	FREQUENCY	METHOD
Little and Often Approach	350 to 500 grams per hectare	Every 7 to 14 Days	Soil or Foliar Applied
Cause and Effect Approach	750 grams to 1 kilogram per hectare	Key Growth Timings • Establishment • Set • Sizing • Plant Stresses	Soil or Foliar Applied

Acadian® 100% Soluble Seaweed Extract can be applied in combination with the standard grower program and is compatible with most nutrients.

Acadian® 100% Soluble Seaweed Extract can be used on most food and non-food crops. Applications may depend on a variety of factors including crop and economics. Please contact your local distributor for the best program.
