

Enriched with seaweed for premium results

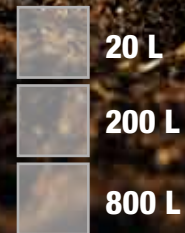

eco-flo dolomite®

CORRECTS ACID SOILS AND BOOSTS CALCIUM & MAGNESIUM LEVELS

ACTIVE INGREDIENTS: 35% w/v Calcium, 12% w/v Magnesium

- Treats acid soils
- Provides Calcium and Magnesium for stronger, healthier plants
- Fast acting liquid concentrate
(more readily available than powdered dolomite)

HOW TO USE

DO NOT store in direct sunlight

DO NOT apply with other Agchem products that are sensitive to elevated pH levels

AVOID spraying directly onto fruit or foliage if white chalky residues are undesirable

AVOID applying around acid loving plants

USE	Soil pH Range	Sand/Loam L/ha	Clay L/ha	HOW TO APPLY
Very Acid Soil	4.5-5.5	75-100	100-125	Apply with a min. dilution of 1 part to 5 parts water. For boom spray min. nozzles size of 06-08 or flood jet nozzles. For uniform application maintain agitation throughout application.
Acid Soil	5.5-6.5	50-75	75-100	
Maintenance	6.5-7.5	25-50	50-75	
Low Ca and or Mg in soil		5-10	10-15	Apply monthly

PRODUCT DESCRIPTION

eco-flo dolomite is a liquid suspension of ultra fine technical grade Calcium and Magnesium carbonate which can be applied by boom spray, aerial application or through irrigation. *eco-flo* dolomite has an average particle size of 10 microns which makes it highly reactive with soil solution. This allows much faster correction of soil pH and more rapid plant access to Ca and Mg when compared with bulk powder or granular products. *eco-flo* dolomite should be applied instead of *eco-flo* lime if Mg has been identified from a soil test to be limiting under acidic growing conditions. *eco-flo* dolomite has been enriched with seaweed to enhance plant root growth and uptake of Ca and Mg.

STORAGE & DISPOSAL: Store in the closed original container in a cool, dry place out of direct sunlight. Triple rinse container and dispose in an environmentally responsible manner.

SAFETY DIRECTIONS: KEEP OUT OF REACH OF CHILDREN. Avoid contact with eyes and if swallowed seek medical advice or contact Poisons Information Centre. Phone Australia 131 126.
