

# SPLAT<sup>TM</sup>

## Bloom

Active Ingredients:	
Honey Bee attractant	10.00%
Other Ingredients:	90.00%
Total:	100.00%

SPLAT Bloom provides an environmentally friendly, bio-degradable, and long-lasting semiochemical tool that increases pollination of flowering crops by honeybees, benefiting growers by enhancing on-farm environmental and economic sustainability.

USE FOR: Honey bees

# SPLAT<sup>TM</sup>

## Bloom

Active Ingredients:	
Honey Bee attractant	10.00%
Other Ingredients:	90.00%
Total:	100.00%

SPLAT Bloom provides an environmentally friendly, bio-degradable, and long-lasting semiochemical tool that increases pollination of flowering crops by honeybees, benefiting growers by enhancing on-farm environmental and economic sustainability.

USE FOR: Honey bees

- Uses species-specific pheromone to modify the behavior of honey bees, inciting them to visit flowers in every portion of the field
- Will not target other insect species
- Lasts 4-6 weeks with one SPLAT application
- Application rate: 1.5kg/ha
- Apply SPLAT as 2.5 - 3 gram dollops evenly distributed throughout the field

ISCA Technologies, Inc.  
1230 Spring St.  
Riverside, California 92507  
USA

phone: 1800 634 204  
email: [info@ocp.com.au](mailto:info@ocp.com.au)

Please read enclosed instructions thoroughly before use. Individual results may vary depending on external factors.

Net Contents: 750 grams
