

COVERS 400m² of LAWN & GARDEN

eco-hydrate[®]

UNIQUE WATER SAVING TECHNOLOGY

ACTIVE INGREDIENT: 270g/L ORGANIC HUMECTANTS, 110g/L ORGANIC SOIL SURFACTANTS

ENRICHED WITH SEAWEED EXTRACT, FULVIC AND AMINO ACIDS

- Reduces water use
- Reduces plant stress
- Improves moisture retention
- Improves water penetration
- 100% biodegradable

Cuts watering by
up to 50%!

HOW DOES ECO-HYDRATE WORK?

When watered into the soil **eco-hydrate** absorbs and stores water as microscopic droplets on roots and soil particles. Moisture from all sources including dews and humidity is stored by **eco-hydrate** effectively giving your plants an extra drink every day. **Watering requirements are reduced by up to 50% when eco-hydrate has been applied.**

eco-hydrate also contains a soil friendly wetting agent to maximize water penetration and correct non-wetting soils.

Use on lawns, veggie patches, pot plants, natives and garden beds.

eco-hydrate hose on	eco-hydrate for pot plants, seedlings and transplants
<ol style="list-style-type: none"> 1. Click hose onto container 2. Remove plug from cap 3. Turn on hose and apply 2L contents evenly to 400m² 4. Wash spray from plants with clean water 5. Re-apply every 3-4 weeks. 	<ol style="list-style-type: none"> 1. Remove cap and measure 50ml Dilute in 1L of water. 2. Apply 200ml of this solution to every 15cm diameter of pot. 3. Re-apply every 3-4 weeks.
