ANAMED™

Protein-Based Fruit Fly Attractant

ANAMED is a non-toxic and bio-degradable emulsion containing oils, waxes, and hydrolysed protein. ANAMED can be used as an effective attract-and-kill when mixed with APVMA Permit based toxicants specifically targeting fruit flies attracted to hydrolysed protein type attractants.

NET CONTENTS: 10L

ANAMED is a viscous emulsion of proteins and female attractants in a matrix of plant waxes, oils and other proprietary materials. It provides rain and UV protection for pheromone and pesticide. ANAMED is a biologically inert and bio-degradable. Its flowable characteristics allow for manual and mechanical application methods as per other splash baits.

DIRECTIONS FOR USE

1. Mix 1L of ANAMED with 2L of water
2. Mix in a suitable pesticide as per Fruit fly management protocols.
3. Apply ANAMED at 1L/ha (excluding water and chemical) to foliage in discrete droplets as you would normally apply splash bait hydrolysed proteins.
4. In an orchard setting apply to every boundary tree and then to every tree in every 2nd row
5. Reapply every 10-14 days late spring early to late summer and every 20 days in autumn-spring

Best results are obtained when applied with area wide male annihilation techniques or SITA and methods targeting mated females.

PLANT SAFETY: Target foliage when applying ANAMED and avoid application to fruit. It is recommended that a phytotoxicity test be conducted on sensitive varieties before wide scale use.

MIXING AND SAFETY: Use a paint stirrer on low speed setting for 2-3 minutes when mixing all ingredients. Use appropriate eye, skin and respiratory equipment if mixing with other pesticide. Strictly adhere to the pesticide manufacturer's label directions and restraints.

STORAGE AND DISPOSAL: Store in the original sealed container in a dry, cool, place, out of direct sunlight. Triple rinse containers before disposal. If recycling replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility.

SAFETY DIRECTIONS: Harmful if swallowed. Do not eat, drink or smoke when using this product. Wash hands, face and all exposed skin thoroughly after handling.

FIRST AID: First aid is not generally required. If in doubt, contact a Poisons Information Centre on 13 11 26 or a doctor.

FOR EMERGENCIES ONLY, CALL AUSTRALIA 1800 033 111 (ALL HOURS)

SDS: Additional information is listed in the Material Safety Data Sheet which can be obtained from the supplier and ocp.com.au

ANAMED is a trade mark of ISCA Technologies Inc. and the OCP drop device is a trade mark of Organic Crop Protectants.
