

OCP only works with the best quality products and that is why we chose ISCA Tech as our sociochemical tech partner to manufacture and supply our lures and traps. ISCA produce the majority of their traps and lures in-house, so they are able to control the quality from start to finish using the highest quality materials for maximum field-life.

Ball Traps (Improved McPhail Trap) – designed to mimic fruit and to hold both liquid food-based attractants, pheromone rubber septa lures and SPLAT. Highly durable polycarbonate plastic

Trap target: Pest that attacks fruit
Sold as single units.

Durable plastic delta traps – designed for season long monitoring using pheromone rubber septa lures or SPLAT. Sticky liners included.

Trap target: Moths and fruit flies
Sold in packs of 10 + 20 sticky liners

Paper delta traps – designed as a low-cost monitoring trap for short season (1-2mths), intermittent pest monitoring. Sticky liner incorporated into design.

Trap target: Moths and fruit flies
Sold in packs of 10

Plastic delta trap liner – replaceable liner for plastic delta traps. Highly tacky and excellent field life for maximum capture rates

Sold in packs of 10
