IPM & Pollinator compatible

Zero withholding period*

Zero re-entry restrictions

Minimal effect on soil biodiversity

No volatile odours, effective at low temps

ACO & USDA-NOP Approved

*Refer to AWRI Dog Book

www.ocp.com.au

Ecocarb PLUS is a dual action curative fungicide containing food grade **Potassium Bicarbonate & Potassium silicate**. When applied on a regular basis, **Ecocarb PLUS** has been proven to control **Powdery Mildew** in Grapes, Vegetables, Strawberries, Roses, Apples and Rust in ornamentals (Geraniums).

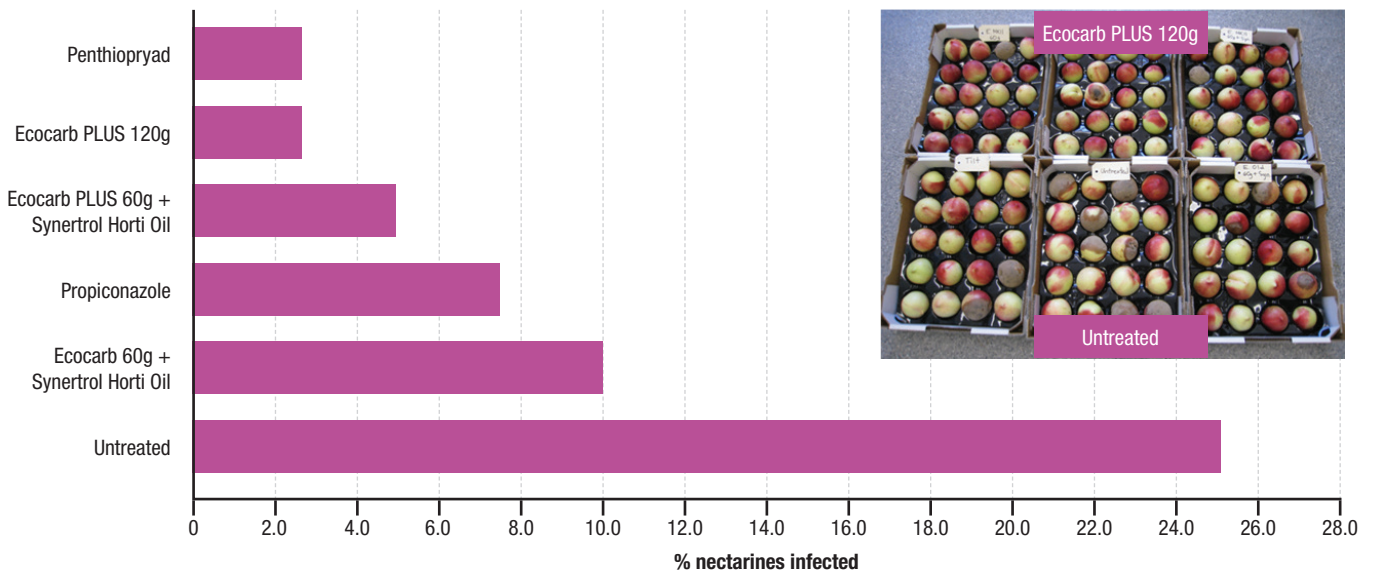

Now with the addition of Potassium silicate, **Ecocarb PLUS** controls **Brown rot** in Nectarines, **Black spot** in Apples and suppresses **Downy mildew** in Grapes.

Ecocarb PLUS is an effective organic alternative to conventional broad spectrum fungicides. It is safe to use in environmentally sensitive areas and within IPDM systems where other fungicides may have the potential to leave undesirable residues on foliage or in the soil. **Ecocarb PLUS** is approved for use in Australian Certified Organic crops is also USDA-NOP approved.

Ecocarb PLUS was effective as Penconazole & Metiram at controlling Powdery mildew and Black spot in Apples

Percentage of nectarines infected with Brown rot - 7 days after harvest.

Powdery mildew on Chardonnay bunches. Loxton 2013-14.

High Pressure Season.
