

eco-flo gypsum[®]

FAST ACTING LIQUID CLAYBREAKER

ACTIVE INGREDIENTS: 19.2% w/v Calcium, 15.3% w/v Sulfur

- Helps break up compacted clay soils & improves drainage
- Helps correct high sodium soils from grey water use
- Provides calcium and sulfur for stronger, healthier plants
- Fast acting liquid concentrate
- Can be applied through fertigation or sprayers*

* Remove filters from spray lines

HOW TO USE

DO NOT store in direct sunlight

AVOID spraying directly onto fruit or foliage if white chalky residues are undesirable

AVOID applying with other Agchem products. Conduct a small jar test for compatibility

USE	Na (%) in Soil	Sand/Loam L/ha	Clay L/ha	HOW TO APPLY
Soil sodium (Na) displacement & compaction relief	5.0-7.5	25-50	50-75	Apply with a min. dilution of 1 part to 5 parts water. For boom spray min. nozzles size of 06-08 or flood jet nozzles. For uniform application maintain agitation throughout application.
	7.5-10.0	50-75	75-100	
	10.0-15.0	75-100	100-125	
	15.0+	100-125	125-150	
Calcium and/or sulfur deficiency		5-10	10-15	Apply monthly.

PRODUCT DESCRIPTION

eco-flo gypsum is a liquid suspension of ultra fine technical grade calcium (Ca) and sulfur (S) that can be boom sprayed, irrigated or aerially applied to crops. **eco-flo** gypsum uses a low particle size solution grade gypsum which makes it highly reactive with clay particles. Greater soil/clay contact translates into more rapid displacement of sodium, faster return to soil structure and uptake of Ca. **eco-flo** gypsum is best applied to soils where surface irrigations of slightly saline irrigation water are used or where the main source of irrigation is from a recycled water source. **eco-flo** gypsum is also used in heavy clay soils where compaction has become evident and in sandy soils where either calcium or sulfur deficiency is being experienced.

STORAGE & DISPOSAL: Store in the closed original container in a cool, dry place out of direct sunlight. Triple rinse container and dispose in an environmentally responsible manner.

SAFETY DIRECTIONS: KEEP OUT OF REACH OF CHILDREN. Avoid contact with eyes and skin. If swallowed seek medical advice or contact Poisons Information Centre. Phone Australia 131 126. FOR EMERGENCIES ONLY CALL: 1800 033 111 (24 HOURS)
