HOME GARDEN APPLICATION RATES

As a guide, one adult handful holds about 70g. One cupful holds about 100g.

Flowers and vegetables	Spread 100g per square metre prior to planting and then every 6 weeks during the growing season.
Fruit trees (all types)	Apply 500g per tree for each year of the tree's age (up to 2.5kg), once in spring and again in autumn.
Rhododendrons, azaleas and acid loving plants	Apply 50–100g per plant once in spring and again in autumn.
Planting trees and shrubs	Apply 200g–500g into the planting hole.
Potted plants	Use 10g for 15cm diameter pot or 30g for a 30cm pot.
Other ornamental shrubs and roses	Apply 100g per square metre every 6–8 weeks from early spring until mid autumn.
Lawns	Spread 70g evenly per square metre.

Note: The application rates above should be used as a guide only.
