

REDUCES SURFACE TENSION • IMPROVES WATER PENETRATION

Granular Wetting Agent MoisturAid[®]

- Enhances water penetration in hydrophobic soils and potting mixes
- Helps eliminate dry spots in soil profiles and turf areas
- Improves plant and turf performance in dry conditions
- Assists fertiliser uptake and water penetration into plant root zone
- Improves drainage in water logged soils reducing surface growth of moss and algae

Suitable for use in nurseries, landscaping, revegetation, councils, forestry, broadacre, viticulture, turf, lawn care, flowers, vegetables and all other fruiting trees and shrubs.

APPLICATION RATES

SITUATION	RATE
Potting Mix	1kg per m ² (at time of blending)
Top Dressing	1g per litre of potting mix (surface applied)
Landscape	30g per m ² for heavy soil 60g per m ² for sandy soil (surface applied)
Tree Crops	1g per litre of back fill OR 30-60g per m ² side dressed (surface applied)
Lawn	30-60g per m ² (surface applied)

Irrigation is recommended within 24 hours after laying turf. Although non-toxic, **KEEP OUT OF REACH OF CHILDREN**. Store in a dry place. Ensure bag is sealed tightly after use, so product does not dry out.
